SUMMARY

Full-stack software engineer with 1.7+ years of experience at Irusri Group, building web, mobile and AI-powered products. Works across React, Next.js, Vue, Node, NestJS and Spring Boot, with hands-on experience in Docker, Linux and CI/CD across AWS, Azure and GCP, plus Kubernetes on self-managed VPS servers. Also builds RAG-based AI features, automates workflows with n8n, delivers WordPress and Shopify sites, and administers Microsoft 365 (Intune, Entra ID, email migrations). BSc (Hons) in Software Engineering, SLIIT. Solid grounding in OOP, data structures, REST API design and agile delivery.

EXPERIENCE

Associate Software Engineer, Irusri Group

Nov 2025 - Present

Full-time, Colombo, Sri Lanka

- Build and ship full-stack features across React, Next.js and Vue front-ends and Node, NestJS and Spring Boot services.
- Containerise applications with Docker and deploy to AWS, Azure and GCP, and run Kubernetes on self-managed VPS servers, with GitHub Actions CI/CD on Linux.
- Develop AI-powered features using RAG systems and LLM APIs (OpenAI, Gemini), and automate internal workflows with n8n.
- Administer Microsoft 365, including Intune device management, Entra ID, email migrations and account provisioning.
- Deliver and maintain client websites on WordPress and Shopify.

Technologies: React, Next.js, NestJS, Spring Boot, Docker, Kubernetes, Linux, CI/CD, AWS, Azure, GCP, VPS, RAG Systems, n8n, Microsoft 365, Intune, WordPress, Shopify

Software Engineer Intern, Irusri Group

Jan 2025 - Nov 2025

Internship, Colombo, Sri Lanka

- Built web application features end to end with the MERN stack (MongoDB, Express, React, Node).
- Followed production workflows: Git-based collaboration, pull-request code review and agile delivery.
- Contributed to REST API design and front-end integration.

Technologies: React, Node.js, Express, MongoDB, Git, REST APIs

EDUCATION

Bachelor of Science (Honours) in Information Technology, Specializing in Software Engineering

2022 - 2026

Graduate, Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka

GCE Advanced Level & GCE Ordinary Level

Advanced Level: Physical Science Stream with ICT, Ananda College, Colombo, Sri Lanka

SKILLS

- **Frontend:** React, Next.js, Vue.js, TypeScript, Tailwind CSS, Redux, HTML / CSS
- **Backend:** Node.js, NestJS, Express, Spring Boot, REST APIs, MVC
- **AI & Automation:** RAG Systems, LLM Integration, OpenAI / Gemini API, n8n, Workflow Automation
- **DevOps & Cloud:** Docker, Kubernetes, Linux, CI/CD Pipelines, GitHub Actions, AWS, Azure, GCP, VPS
- **Microsoft 365 & Endpoint:** Microsoft 365 Admin, Intune (MDM), Entra ID, Email Migration, Account Management
- **CMS & E-commerce:** WordPress, Shopify, WooCommerce, Headless CMS
- **Mobile:** React Native, Expo, Nativewind
- **Databases:** MongoDB, PostgreSQL, MySQL, Oracle, Redis
- **Languages & Tools:** Java, Python, C / C++, PHP, Git / GitHub, Postman, Figma

PROJECTS

SmartBus Transit App

Research project: a real-time public-transport app with live bus tracking, crowd forecasting for future time slots, and ETA prediction. Predictions come from a Bus ETA Engine (XGBoost Regressor) and a Hybrid Crowd Forecasting Engine (Random Forest Regressor); an edge-optimised NLP Intent Engine (TF-IDF with balanced Logistic Regression) answers transit queries offline at millisecond latency.

Technologies: React Native, Expo, TypeScript, Firebase, Python, Flask, scikit-learn, XGBoost

Repository: github.com/lahiruAsiri/SmartBusApp

NovaTech E-Commerce Platform

Full-stack e-commerce platform. The backend is split into NestJS microservices (an API gateway plus admin, product, order and notification services) with JWT auth, Swagger docs and Prisma on Azure SQL; a Next.js frontend consumes them through the gateway. Each service has a GitHub Actions pipeline that builds a Docker image, runs a Snyk vulnerability scan and a SonarCloud quality gate, and deploys to Azure Web Apps.

Technologies: NestJS, Next.js, TypeScript, Microservices, API Gateway, Prisma, Docker, GitHub Actions, Snyk, SonarCloud, Azure

Repositories: Backend: github.com/lahiruAsiri/NovaTech-Backend, Frontend: github.com/lahiruAsiri/NovaTech-Frontend

Book Factory Management System

MERN-stack web application for a book factory, covering inventory, raw-material, order and transport management. Includes role-based access, low-stock alerts and reporting dashboards.

Technologies: MongoDB, Express, React, Node

Repository: github.com/lahiruAsiri/Book-Factory-Management-System

ProMentor Education

Interactive coding-mentor platform with a drag-and-drop block editor. Uses the Gemini API to generate step-by-step explanations, detect mistakes and suggest corrections in real time for beginner programmers.

Technologies: React, Node, Express, Gemini API

Repository: github.com/lahiruAsiri/ProMentor-Education-Application

MomCare App

Cross-platform mobile app for expectant and new mothers. Tracks baby growth, delivers personalised health tips and reminders, and helps users find doctors and manage clinic visits from a single place.

Technologies: React Native, Node, Express, MongoDB

Repository: github.com/lahiruAsiri/MomCare-App

Smart Waste Management

Web platform that monitors bin fill-levels, optimises collection routes and pushes real-time status updates, cutting fuel use and operational cost for waste-collection operators.

Technologies: React, Spring Boot

Repository: github.com/lahiruAsiri/Smart-Waste-Management-System

Vehicle Service Station System

Java MVC web application for a vehicle service station, handling customer accounts, vehicle records, service scheduling and transport-service tracking through an intuitive interface.

Technologies: Java, MVC, Apache Tomcat, JavaScript

Repository: github.com/lahiruAsiri/Vehicle-And-Fuel-Management-System
